

Contamination is inevitable, but it is treatable. L&R's ever-growing repertoire of state-of-the-art remediation methods enables us to take on any job, whether it's removing a residential underground tank or completing a superfund site remediation.

Our clients understand that a mishandled remediation only exposes the responsible party to more liability and litigation further down the line. That's why they rely on L&R's turn-key remediation services to ensure that every site is safely and efficiently handled in accordance with all local, state, and federal regulations.

Here is how L&R can help with your remediation efforts:

- L&R Owned PCS & Wastewater Treatment Facility
- Contaminated Soil and Groundwater Treatment
- UST Closure and Excavation
- Facility Decontamination and Decommissioning
- Demolition
- Storage Tank Cleaning and or Removal
- Excavation
- Bioremediation
- Lab Packing
- Dewatering Vacuum Truck Services
- Vault Pumping
- (ESA's) Phase I, II, III Environmental Site Assessments
- (SPCC) Spill Prevention Plans
- (SWPP) Stormwater Pollution Prevention Plan
