

L&R is the leading provider of bulk liquid non-hazardous wastewater transport and disposal in the North Western United States.

Our fleet of specialized trucks are designed specifically to transport the maximum legal payload of product (105,000 lbs) per load. We have different equipment configurations to ensure efficient, safe, and compliance with various state and highway load limits.

We run Vacuum Tankers and Pumper Tankers so whatever your product is we can self-load and unload.

We Transport

- Bulk Used and New Oil
- Bulk Used and New Antifreeze
- Bulk Fats, Oils, Tallow & Greases
- Bulk Chemicals and Fertilizers

We can also provide

- Vault and Storm Drain Cleaning
- Transloading Services
- Flatbed Hauling
- End-dump Hauling

Give us an opportunity to demonstrate our superior customer service and earn your business!

HIGH QUALITY SERVICE AT A GREAT VALUE

We understand that customers have a choice who they do business with. We strive to build long term relationships through reliable, honest, and ethical services at a great value. We are a full-service company that can provide responsible solutions to all your environmental needs.
